

This is a thesis (incomplete) for the "Clock Numerology" Cipher...
->cipher code is just below this paragraph

A=2
B=3
C=12
D=11
E=15
F=17
G=18
H=13
I=10
J=7
K=7
L=10
M=13

This cipher is the same forwards & backwards
->for example, N=13; O=10; P=7; etc

—
How was it derived?

I do not remember exactly how I got these numbers
->this cipher was inspired by an 'event' (supernatural/alien) I witnessed on
8/24/08
->I thought it had to do something with time

It went something like...

60:60:1 (was the formula I was inspired by)
->60 sec
->60 min
->make up and hour (of the day / excluding 24 in this formula)

Letter A
-> $60 \times 60 \times 1 = 3600$
-> $3 \times 6 ?$

Letter B
-> $3600 \times 60 = 21600$
-> $2 \times 1 \times 6 ?$

I may have subtracted rather than multiplied.
->Lastly, for the final step, I added 1 to the first half of the alphabet...
->And then subtracted 1 from the last half of the alphabet.
->Or?
->added 1 to letters A & B and then subtracted 1 from letters Y & Z

Summary,

I did not realize this cipher was rational (same forwards & backwards) until
maybe several days or even a couple weeks after I authored it. Thus, this is
the reason why all my ciphers after this are rational.
